

The figure is a scatter plot with the x-axis labeled 'Coordenadas x' ranging from 4000 to 11000 and the y-axis ranging from 0 to 140. There are two data series: 'Control' represented by blue dots and 'Tratamiento' represented by red dots. The 'Control' points are concentrated in the upper right quadrant, with x-coordinates between 9500 and 10500 and y-coordinates between 100 and 140. The 'Tratamiento' points are concentrated in the lower left quadrant, with x-coordinates between 4000 and 5000 and y-coordinates between 10 and 140. A red line connects the points of the 'Tratamiento' group, showing a path that starts at (4000, 140) and ends at (10000, 140). The path is composed of several segments, with the final segment being a long horizontal line connecting the point at (4000, 140) to the point at (10000, 140).
